SPC
SWEEPER

STANDARD EQUIPMENT

Support pivot wheels

Mechanical adjustment of the roller height according to its wear

Roller hydraulic engine

DIN type attachment plate with mechanical orientation

Brush with PPL rings \varnothing 600 mm

Parking feet

OPTIONAL FEATURES

Hydraulic orientation

Hydraulic lateral brush with lifting cylinder

Dust control and suppression kit equipped with a 12V pump and a 300 L tank

Dust control and suppression kit equipped with a 12V pump and a 100 L tank

Pair of led side marker lights

Pair of working lights

Front collection box with hydraulic discharge system

Telescopic attachment

DIN plate attachment gr. 3

Three-point hitch lifting attachment for tractors

Skid loader attachment

Wheel loader attachment

1. Main features

Front sweeper completely made of steel metal sheets, frame in tubular steel sheets with high technical features, upper protection in polyethylene and adjustable PVC splashguard tarpaulin. The sweeping roller is equipped with mixed PPL/steel interchangeable rings. Pivoting wheels with adjustable support, very useful to manage the pressure of the brushes on the roller and to check wear out process.

2. Mode of operation

Hydraulically driven by means of a hydraulic engine installed on the sweeper.

3. Power supply

By means of the hydraulic system available on the vehicle (min. 30 L - 90 bar).

4. Standard features

DIN 76060 A/B plate attachment, hydraulic orientation, brushes in steel /PPL, parking feet.

5. Optional Features

Pair of jointed wheels, PVC splashguard tarpaulin with adjustable support, pair of LED side marker lights, pair of working lights, front lifting attachment for agricultural tractors, rear lifting attachment for agricultural tractors, backhoe loaders and wheel loader attachment, skid loader attachment.
